SUMMARY

Full-Stack Developer with 1+ year of production experience building scalable web applications using React.js, Next.js, and Node.js. Specialised in real-time systems, IoT data dashboards, and modular SaaS platforms. Experienced with time-series databases (InfluxDB), event-driven architectures (SSE), and CI/CD pipelines. Delivered projects serving government infrastructure (Indian Railways) and U.S. housing markets.

EDUCATION

Masai School

Full-Stack Web Development Program

Bengaluru, India

Nov. 2023 – Jun. 2024

Moradabad Institute of Technology

Bachelor of Technology (B.Tech)

Moradabad, UP

Jul. 2017 – Jun. 2022

EXPERIENCE

Creware Technology Pvt. Limited

Full-Stack Web Developer

Jan. 2025 – Present

Bangalore, India

- Developed and maintained production-grade web applications using React.js and Next.js, serving **5,000+ daily active users** across web and mobile platforms.
- Designed and built 5+ modular features including General Bills, Customer Management, Vendor Module, Dashboard, and All Transactions using reusable component architecture, reducing feature development time by **30%**.
- Optimised API performance by refactoring inefficient queries and eliminating redundant back-end calls, reducing average API response time by **40%** and improving system responsiveness.
- Led development of an internal analytics dashboard handling data ingestion pipelines, schema modelling, and RESTful back-end services, cutting manual reporting effort by **60%**.
- Established end-to-end CI/CD pipelines using GitHub Actions to automate testing, build validation, and deployment, reducing deployment time from manual.
- Integrated real-time push notifications using event-driven architecture (SSE/WebSockets), increasing user session engagement by **25%**.
- Collaborated directly with clients to gather business requirements and translate them into production-ready, user-centric features aligned with business goals.

PROJECTS

NEI – IoT Monitor System | *React, SSE, FastAPI, Python, PostgreSQL, InfluxDB*

Jan. 2026 – Present

- Built a real-time sensor data visualization platform for **Indian Railways**, enabling live monitoring of **100+ sensor nodes** across multiple railway locations with zero-latency updates.
- Implemented Server-Sent Events (SSE) for live data streaming to the frontend, eliminating WebSocket overhead and achieving **sub-second latency** on sensor feeds.
- Integrated **InfluxDB** as the time-series database to handle high-throughput sensor writes (**10,000+ data points/min**), enabling fast aggregation and anomaly detection queries.
- Built interactive real-time graphs using Motion and Ant Design to visualize sensor readings, thresholds, and anomalies; applied debouncing and memoization to cut unnecessary re-renders by **50%**.
- Designed Role-Based Access Control (RBAC) supporting admin, operator, and viewer roles with row-level data isolation.

Big Island Housing | *Next.js, NestJS, Node.js, Tailwind CSS, AWS S3, MongoDB*

Jul. 2025 – Dec. 2025

- Contributed to a scalable property management and rental platform engineered to support **10,000+ concurrent users** in the U.S. housing market.
- Built back-end modules in NestJS with AWS S3 integration for property image/document uploads, handling **file sizes up to 50MB** with streaming upload support.

- Designed JWT-authenticated REST APIs and WebSocket-based real-time chat and notification system, reducing average message delivery time to **under 200ms**.
- Implemented applicant management workflows including application submission, tracking, and multi-step approval via secure RESTful APIs.

Bahikhata – Business Platform | *React, Next.js, Node.js, Tailwind, MongoDB* Jan. 2025 – Mar. 2025

- Built a full-stack business accounting web platform supporting **multi-user environments** with role-based access control and secure JWT authentication.
- Developed RESTful APIs in Node.js handling core billing workflows, business logic, and data interactions, processing **500+ transactions/day** in test environments.

Fitify – Health & Fitness Platform | *React, Material-UI, Firebase* (Freelance) Apr. 2025 – Jun. 2025

- Built and optimised React.js frontend components ensuring responsive UX across desktop and mobile; reduced page load time by **20%** through lazy loading and code splitting.
- Integrated Firebase Authentication and Realtime Database for secure user access and seamless coach-client data synchronisation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, Tailwind CSS, Ant Design, Material-UI, Motion, GraphQL, Responsive Web Design

Backend: Node.js, Express.js, NestJS, Koa.js, FastAPI, REST APIs, GraphQL APIs, Strapi, Server-Sent Events (SSE)

Databases: MongoDB, PostgreSQL, InfluxDB (time-series), Firebase

Cloud & DevOps: AWS S3, GitHub Actions (CI/CD), Docker

Security: JWT, Auth0, OAuth2, Role-Based Access Control (RBAC), Secure API Design

Tools: Git, GitHub, VS Code, Postman
